No Water, No Life! No Blue, No Green!!

Education through sports is one of our interventions for kids and the community to be knowledgeable on the sanitation of the environment we live. A clean place is a safe place for us to enjoy the health and vigor of life for our sporting activities as well.

KidzRun is an integral part of our sanitation campaign since 2021. It helps in the attainment of the ultimate aim of education that is the achievement of holistic development and played a vital role in the kid's life.

Along with bookish learning, Kids should be assisted to understand Hygiene is two thirds their health.

Considering the concept of "SPORTS FOR ALL" throughout the entire session we organized KidzRun for the schools in fetentaa at the start. It is one of the largest co-curricular activity programs that offer an extensive opportunity to all Kids. This venture enable the schools children and staff to have fun, learn new things in the society, enhance social

interaction and tests one's physical capability.

Much like charity begins at home, Sanitation and hygiene starts with you and I. We kept with our strategic plan for an expansion. Some schools in the Berekum West District were invited to participate the KidzRun festive to educate them as well.

Whether cheering or playing, we all thought of a common goal, sports for change! We educate schools and the community to always stay clean. In collaboration with Nananom, Ghana Education Service, Head Teachers, Teachers, Schools children and the community involvement we were able to achieve 45% cleanness in our schools in the year 2022.

They work very hard for converting their sweat in winning trophies for the fame of their schools and contributed to the WASH project talk.

KidzRun Festivities brought in happy moments and implicit learning among Kids and the community. A group of parents, Teachers and classmates watched with pride as their Kids, friends run 2kilometers with nervous confidence.

Today irrespective of our identified aptitude status, we have realized 3 mechanized boreholes and 16 seater toilet facility in fetentaa, which 2 schools have each access to portable drinking water and 1 for the community with 16 seater toilet facility.

With dedication, regular education and WATSAN engagements in fetentaa schools, 50% kids know the significance and practice hand wash. Harnessing alternative sources of energy and most importantly Kids, believe in what they have learnt, convinced to apply it in the real world

We are convinced that experiential learning through sports not only KidzRun can be a permanent assimilation of knowledge, that education is a journey of joyous discoveries making way for innovations and that a group of well-intentioned, motivated kids and citizens can make it all happen.

Education from the Ambulance unit was also resourceful to the entire kids and Teachers on the field.

Over the past year, KidzRun has developed immensely. We have managed to stabilize our hold within 10 schools in the Berekum West District. We have successfully managed to establish a set of sporting activities and other educative programs that can be carried in dedication of the WASH project and not forgetting about our sporting club in mind.

None of this would have been possible without your support. We would like to sincerely thank you for

your help, without which Support 4 Ghanaian Kids would not be where it is today. And our doors are always open for your support. Thank you
